Working Group Earthworks and Foundations Committee: Testing Equipment

Director:

Dipl.-Ing. (FH) Marcel Neuhaus, Münster

Members:

Dipl.-Ing. Alexander Cejka, Hamburg

Dr. rer. nat. Dipl.-Math. Tilmann Deutler, Mannheim/Lampertheim

Dipl.-Ing. Ulrich Diehl, Herdecke

Dr.-Ing. Dirk Jansen, Bergisch Gladbach

Prof. Dr.-Ing. Kurt Kliesch, Frankfurt/Main

Dipl.-Ing. Hans-Josef Kloubert, Boppard

Dipl.-Ing. Bernd Kratzer, Berlin

Prof. Dr.-Ing. Wolfram Kudla, Freiberg

Dipl.-Ing. Hermann Lammen, Münster

Dipl.-Ing. Werner Lange, Cologne

Dipl.-Phys. Reinhardt Nickol, Halberstadt

RBDi. Dipl.-Ing. André Paulsen, Neumünster

Dipl.-Ing. (FH) Hartmut Reichenbach, Abstatt

Dipl.-Ing. Franz Schlögl, Munich

Dipl.-Ing. (FH) Dieter Straußberger, Nuremberg

Prof. Dr.-Ing. Wolfgang Weingart, Barleben

Preliminary remark:

The present part B 8.4 “Calibration Rules for the Light and Medium Drop-Weight Tester” of the Technical testing regulations for soil and rock in road construction (“TP BF-StB”) was drafted by the Committee “Testing Equipment”.

The calibration rules apply to the Light Drop-Weight Tester according to the “Technical testing regulations for soil and rock in road construction” (TP BF-StB), Part B 8.3, and to the Medium Drop-Weight Tester according to the “Technical testing regulations for aggregates in road construction” (TP Gestein-StB), Part 8.2.1 “Dynamic Plate Load Testing with the Medium Drop-Weight Tester”.

Table of Content

	page
1 General	5
2 Calibration of the loading mechanism	8
2.1 Devices and application	8
2.2 Outlier test for a force measurement series	10
2.3 Calculations from the measurement results	11
2.4 Result evaluation and consequences; decision-making rules	11
2.5 Recommended measuring technique for force measurement	12
3 Calibration of the settlement measuring instrument ...	13
3.1 Devices and application	13
3.2 Outlier test for a settlement measurement series	16
3.3 Calculations from the measurement results	18
3.4 Result evaluation and consequences; decision-making rules	19
3.5 Recommended measurement equipment for settlement measurements	21
4 Symbols and Abbreviations	22
5 Technical Regulations	25
Appendix: Example of a calibration protocol for a Medium Drop-Weight Tester	26

Remarks on the system of technical publications of the FGSV

R stands for regulations:

These publications either specify the technical design or realization (R1) or give recommendations on the technical design or realization (R2).

W stands for information documents:

These publications represent the current state-of-the-art knowledge and define how a technical issue shall be practicably dealt with or has already been successfully dealt with.

Category R1 indicates 1st category regulations:

R1-publications contain the contractual basis (Additional Technical Conditions of Contract and Guidelines, Technical Conditions of Delivery and Technical Test Specifications) as well as guidelines. They are always coordinated within the FGSV. R1-publications – in particular if agreed on as integral part of the contract – have a high binding force.

Category R2 indicates 2nd category regulations:

R2-publications contain information sheets and recommendations. They are always coordinated within the FGSV. Their application as state-of-the-art technology is recommended by the FGSV.

Category W1 indicates 1st category documents of knowledge:

W1-publications contain references. They are always coordinated within the FGSV but not with external parties. They represent current state-of-the-art knowledge within the respective responsible boards of the FGSV.

Category W2 indicates 2nd category documents of knowledge:

W2-publications contain working papers. These may include preliminary results, supplementary information and guidance. They are not coordinated within the FGSV and represent the conception of an individual board of the FGSV.
