## **Working Group Earthworks and Foundations Committee: Earth and Rock Works**

**Chairman:**

Akad. Dir. Dr.-Ing. Heyer, München

**Members:**

Dr. rer. nat. Binard-Kühne, Wetzlar  
Dipl.-Ing. Blaim, Deggendorf  
Ltd. BDir. Dipl.-Ing. Custodis, München  
Dipl.-Geol. Fischer, Frankfurt/Main  
Dipl.-Ing. Frühbote, Rostock  
BDir. Dipl.-Ing. Gietl, Landshut  
Dipl.-Ing. Hecht, Berlin  
RDir. Dipl.-Ing. Hillmann, Bergisch Gladbach  
Dipl.-Ing. Kloubert, Boppard  
Prof. Dr.-Ing. Kudla, Freiberg  
Dr. rer. nat. Dipl.-Min. Kuhl, Wiesbaden  
Dipl.-Ing. Möbius, Hamburg  
Herr Regel, Steinsfeld  
ORBR'in Dipl.-Ing. (FH) Schleiter, Gelsenkirchen  
Dipl.-Ing. Schüßler, Hohen Neuendorf  
BOR Dipl.-Ing. Sieber, Bonn  
Dipl.-Ing. (FH) Straußberger, Nürnberg  
Dipl.-Ing. (FH) Ströhle, Tuttlingen  
Dipl.-Geol. Taetz, Hamburg

### **Preliminary note**

The "Additional technical conditions of contract and directives for earthworks in road construction", edition 2009 (ZTV E-StB 09) have been compiled by the "Earth and rock works" committee supported by the other working bodies within the "Earthworks and Foundations" working group. They replace ZTV E-StB, editon 1994.

## Table of Contents

	page
<b>1 General</b> .....	9
<b>1.1 Scope of application</b> .....	9
<b>1.2 Definitions</b> .....	10
<b>1.3 Preparatory work and work during construction</b> .....	11
<b>1.4 Building materials</b> .....	12
<b>1.5 Execution</b> .....	12
<b>1.6 Testing</b> .....	14
1.6.1 General .....	14
1.6.2 Suitability tests .....	14
1.6.3 Self-monitoring tests .....	15
1.6.4 Control tests .....	16
1.6.4.1 Control tests .....	16
1.6.4.2 Arbitration tests .....	16
<b>1.7 Acceptance of test lots</b> .....	17
<b>1.8 Deficiency claims</b> .....	17
1.8.1 Handling deficiencies .....	17
1.8.2 Limitation period for deficiency claims .....	17
<b>1.9 Accounting</b> .....	17
<b>2 Geotechnical investigations</b> .....	19
<b>2.1 General</b> .....	19
<b>2.2 Type and scope of explorations</b> .....	20
<b>2.3 Investigation procedures</b> .....	20
<b>2.4 Description of construction ground conditions</b> .....	21
<b>3 Soil and rock, geosynthetics and lightweight construction materials</b> .....	23
<b>3.1 Classification of soil and rock</b> .....	23
3.1.1 General .....	23
3.1.2 Soil and rock classification .....	23
3.1.3 Assessment of frost susceptibility and frost resistance .....	25
3.1.3.1 Frost susceptibility of soils and rocks of variable hardness .....	25
3.1.3.2 Frost susceptibility after soil improvement with binder .....	26
3.1.3.3 Frost resistance of rock .....	26
3.1.3.4 Frost susceptibility and frost resistance of building materials according to TL BuB E-StB .....	27

	page
<b>3.2 Soils and building materials according to TL BuB E-StB</b>	27
3.2.1 General .....	27
3.2.2 Requirements .....	28
3.2.3 Testing .....	28
<b>3.3 Geosynthetics .....</b>	28
3.3.1 General .....	28
3.3.2 Application .....	29
3.3.3 Requirements .....	29
3.3.3.1 Stability .....	29
3.3.3.2 Resistance to mechanical action .....	30
3.3.3.3 Filter characteristics .....	31
3.3.4 Testing .....	31
3.3.4.1 Sampling .....	31
3.3.4.2 Suitability test .....	32
3.3.4.3 Self-monitoring tests .....	32
3.3.4.4 Control tests .....	34
<b>3.4 Lightweight construction materials .....</b>	34
<b>4 Trenches and dams .....</b>	35
<b>4.1 Loosening and loading .....</b>	35
4.1.1 General .....	35
4.1.2 Cut sections .....	35
4.1.3 Loosening processes for rock .....	36
4.1.4 Blasting plans and legal requirements .....	36
4.1.5 Loosening rock .....	37
<b>4.2 Conveying .....</b>	37
<b>4.3 Installation and compacting .....</b>	37
4.3.1 Execution .....	37
4.3.2 Compacting requirements .....	40
<b>4.4 Planum .....</b>	42
<b>4.5 Modulus of deformation .....</b>	44
<b>4.6 Water run-off .....</b>	45
<b>4.7 Shoulder .....</b>	46
4.7.1 Building materials .....	46
4.7.2 Installation and compacting .....	46
<b>4.8 Working during and after freezing weather .....</b>	47
<b>5 Topsoil work .....</b>	47
<b>6 Slopes .....</b>	48
<b>7 Sealing .....</b>	50

	page
<b>7.1 General</b> .....	50
<b>7.2 Seals made of mineral soils, soil mixtures and building materials</b> .....	51
<b>7.3 Seals made of geosynthetic membranes and geosynthetic clay liners</b> .....	52
<b>7.4 Other sealing systems</b> .....	52
<b>8 Seepage systems and filter layers</b> .....	52
<b>8.1 General</b> .....	53
<b>8.2 Seepage channels</b> .....	53
<b>8.3 Seepage and filter layers</b> .....	54
<b>9 Building pits and pipe trenches</b> .....	54
<b>9.1 Production</b> .....	54
<b>9.2 Filling</b> .....	55
<b>9.3 Building materials</b> .....	55
<b>9.4 Installation and compacting</b> .....	56
<b>9.5 Compaction requirements</b> .....	56
<b>10 Backfilling and covering structures</b> .....	57
<b>10.1 General</b> .....	57
<b>10.2 Building materials</b> .....	58
<b>10.3 Installation and compacting</b> .....	59
<b>10.4 Covered, flexible arches</b> .....	60
<b>10.5 Grid constructions</b> .....	60
<b>10.6 Reinforced support structures</b> .....	61
<b>10.7 Drainage</b> .....	61
<b>11 Protective barriers</b> .....	62
<b>11.1 Principles</b> .....	62
<b>11.2 Installation and compacting</b> .....	63
<b>11.3 Topsoil work</b> .....	63
<b>12 Soil treatment with binders</b> .....	63
<b>12.1 Application</b> .....	63
<b>12.2 Execution</b> .....	64
<b>12.2.1 Soil stabilization</b> .....	64
<b>12.2.1.1 Mixed-in-place technique</b> .....	64
<b>12.2.1.2 Mixed-in-plant technique</b> .....	65
<b>12.2.1.3 Installation and compaction applying the mixed-in-place and mixed-in-plant techniques</b> .....	66

	page
12.2.2 Soil improvement .....	67
12.2.3 Thickness .....	67
12.2.4 Width and transverse inclination .....	67
12.2.5 Processing time .....	68
12.2.6 Curing .....	68
12.2.7 Protective measures .....	68
<b>12.3 Building materials .....</b>	<b>69</b>
12.3.1 Soils and other building materials .....	69
12.3.2 Binders .....	69
<b>12.4 Requirements .....</b>	<b>71</b>
12.4.1 General .....	71
12.4.2 Soil stabilization .....	71
12.4.2.1 Hydraulic binder quantities .....	71
12.4.2.2 Binder quantity for building limes .....	72
12.4.2.3 Binder quantity for combination binders and other agreed binders .....	72
12.4.2.4 Characteristic compaction values .....	72
12.4.2.5 Verifying binder quantity .....	73
12.4.2.6 Surface .....	73
12.4.2.7 Evenness .....	73
12.4.2.8 Installation thickness .....	73
12.4.3 Qualified soil improvement .....	73
12.4.3.1 Binder quantity .....	73
12.4.3.2 Characteristic compaction values .....	74
12.4.3.3 Verifying binder quantity .....	74
12.4.3.4 Surface, evenness, installation thickness .....	74
12.4.4 Soil improvement .....	74
12.4.4.1 Characteristic compaction values .....	74
12.4.4.2 Surface, evenness, installation thickness .....	74
<b>13 Measures to improve base and substructure with low load-bearing capacity .....</b>	<b>74</b>
<b>13.1 Principles .....</b>	<b>74</b>
<b>13.2 Mechanical soil improvement .....</b>	<b>75</b>
<b>13.3 Building techniques on bases with low load-bearing capacity .....</b>	<b>76</b>
13.3.1 General .....	76
13.3.2 Stabilization procedures .....	76
13.3.3 Soil replacement .....	77
13.3.4 Base improvement .....	77
13.3.5 Techniques using elevated foundation pads .....	78
13.3.6 Use of lightweight building materials .....	78
13.3.7 Use of geosynthetics .....	78

	page
<b>14 Testing the attained quality .....</b>	<b>79</b>
<b>14.1 General .....</b>	<b>79</b>
<b>14.2 Methods for testing compaction parameters .....</b>	<b>79</b>
14.2.1 General .....	79
14.2.2 Method M 1: procedure according to test plan .....	80
14.2.3 Method M 2: application of full-area dynamic measuring procedure .....	82
14.2.4 Method M 3: monitoring of the work process .....	84
<b>14.3 Test procedures to determine characteristic values for compaction .....</b>	<b>86</b>
14.3.1 Sampling and test procedures .....	86
14.3.2 Degree of compaction $D_{Pr}$ .....	87
14.3.3 Dry density $\rho_d$ and porosity n .....	87
14.3.4 Air void content na .....	87
14.3.5 Indirect test procedures for degree of compaction .....	87
<b>14.4 Testing modulus of deformation, profile layer trueness and evenness on the planum .....</b>	<b>89</b>
<b>14.5 Tests during soil treatment .....</b>	<b>89</b>
14.5.1 Tests during soil stabilization .....	89
14.5.2 Tests during qualified soil improvement .....	91
14.5.3 Tests during soil improvement .....	91
<b>14.6 Tests during structure backfill .....</b>	<b>91</b>
<b>14.7 Other test procedures .....</b>	<b>91</b>
<b>15 Documentation of quality assurance .....</b>	<b>92</b>
 <b>Appendix 1:</b> Deductions for non-conformance to requirements on soil stabilization .....	95
<b>Appendix 2:</b> Building material receipt inspection for geosynthetics ..	97
<b>Appendix 3:</b> Control tests for geosynthetics .....	99
<b>Appendix 4:</b> Soil and rock classification (according to VOB – Part C: General technical specifications in construction contracts (ATV) – earthworks, ATV DIN 18300, October 2006 issue*) .....	100
<b>Appendix 5.1:</b> Soil classification for construction purposes (according to DIN 18186, June 2006 issue); german version .....	102
<b>Appendix 5.2:</b> Plasticity diagram with soil groups (according to DIN 18196*), June 2006 issue); german version .....	104
<b>Appendix 6:</b> Technical regulations .....	105

## List of illustrations

<b>Figure 1:</b> Embankment/cut slope (schematic diagram) . . . . .	10
<b>Figure 2:</b> Frost susceptibility classification . . . . .	26

## List of tables

<b>Table 1:</b> Classification of soil groups by frost susceptibility . . . . .	25
<b>Table 2:</b> Requirements for the 10 % minimum quantile <sup>1)</sup> for degree of compaction $D_{Pr}$ or for the 10 % maximum quantile <sup>2)</sup> for air voids content $n_a$ . . . . .	41
<b>Table 3:</b> Requirements for the 10 % minimum quantile of compaction $D_{Pr}$ and the 10 % maximum quantile for the air voids content $n_a$ of seals . . . . .	51
<b>Table 4:</b> Lime reactivity requirements . . . . .	70
<b>Table 5:</b> Lime fineness requirements . . . . .	70
<b>Table 6:</b> Criteria for determining the binder quantity in suitability testing for stabilization of fine and mixed-grain soils . . . . .	72
<b>Table 7:</b> Sample size and acceptance factor for a simple plan for variables testing depending on the size of the test lot . . . . .	82
<b>Table 8:</b> Minimum number of self-monitoring tests . . . . .	86
<b>Table 9:</b> Guide values for allocation of the static modulus of deformation $E_{V2}$ to the degree of compaction $D_{Pr}$ for coarse-grained soils . . . . .	88
<b>Table 10:</b> Guide values for allocation of the dynamic modulus of deformation $E_{vd}$ to the degree of compaction $D_{Pr}$ for coarse-grained soils . . . . .	88
<b>Table 11:</b> Type and scope of testing during soil stabilization . . . . .	90

## **Remarks on the system of technical publications of the FGSV**

### **R stands for regulations:**

These publications either specify the technical design or realization (R1) or give recommendations on the technical design or realization (R2).

### **W stands for information documents:**

These publications represent the current state-of-the-art knowledge and define how a technical issue shall be practicably dealt with or has already been successfully dealt with.

Category R1 indicates 1<sup>st</sup> category regulations:

R1-publications contain the contractual basis (Additional Technical Conditions of Contract and Guidelines, Technical Conditions of Delivery and Technical Test Specifications) as well as guidelines. They are always coordinated within the FGSV. R1-publications – in particular if agreed on as integral part of the contract – have a high binding force.

Category R2 indicates 2<sup>nd</sup> category regulations:

R2-publications contain information sheets and recommendations. They are always coordinated within the FGSV. Their application as state-of-the-art technology is recommended by the FGSV.

Category W1 indicates 1<sup>st</sup> category documents of knowledge:

W1-publications contain references. They are always coordinated within the FGSV but not with external parties. They represent current state-of-the-art knowledge within the respective responsible boards of the FGSV.

Category W2 indicates 2<sup>nd</sup> category documents of knowledge:

W2-publications contain working papers. These may include preliminary results, supplementary information and guidance. They are not coordinated within the FGSV and represent the conception of an individual board of the FGSV.
